PORTFOLIO

George Bush Intercontinental Airport Houston, TX

The Greater Houston metropolitan area is served by George Bush Intercontinental Airport. In one year, the airport served approximately 43.8 million people, ranking it as the 14th busiest airport in the United States.

Project Design Brief

To facilitate the loading and unloading of domestic and international cargo aircraft, the new cargo area at Houston George Bush Intercontinental Airport required a relatively flat surface. Furthermore, the grates had to withstand continuous heavy load traffic.

Benefits

- Fabricated corners and fully assembled trench sections allow for a quick installation.
- The hydraulic performance of the 12" width system is efficient.
