

ACO. creating
the future of drainage

PORTFOLIO

Mobile Container Terminal Choctaw, AL

The Mobile Container Terminal is an expansion of the Alabama State Port Authority Dock Facilities in Mobile, Alabama.

Project Design Brief

The waterfront area is prone to ponding. The trench drainage system would prevent run off water from the different equipment and from any storms that come through the area.

Benefits

- A 15" FRP trench drain with ductile iron grates was chosen to remedy the ponding issues.
- AquaDuct met all the hydraulic capacity, corrosion resistance and loading requirements for the new docking terminal.

ACO AquaDuct 8" Custom Fiberglass Trench Drain with ADA Grates
