we care for water

PORTFOLIO

Siesta Drive Sarasota, FL

Siesta Drive is a 3-mile road that crosses over to Roberts Bay and onto Bay Island. In addition, positioned between Venice and Nokomis, Roberts Bay is a popular crossroads for boaters.

Project Design Brief

The City of Sarasota and the Florida Department of Transportation joined forces to resolve drainage problems along this narrow stretch of road leading out of Siesta Key. The project was designed to resolve flooding issues along the sides of the road during heavy storms and would involve widening the road and adding almost 3,000 linear feet of trench drains.

Benefits

- A galvanized steel bar grate offered a high intake capacity to ensure rapid removal of water during the storm.
