

ACO. creating
the future of drainage

PORTFOLIO

Times Square New York, NY

Times Square, sometimes referred to as "the Crossroads of the World" is a major commercial intersection, tourist destination, entertainment center, and is brightly lit by numerous billboards and advertisements. It is located in the Midtown Manhattan section of New York City, at the junction of Broadway and Seventh Avenue.

Project Design Brief

Landscape architecture for the reconstruction of Times Square was handled by the internationally recognized design firm Snohetta. It quickly became apparent to Snohetta that off-the-shelf drainage systems were not physically or aesthetically up to the task for this application. Therefore, Aquaduct engineers to design and manufacture a completely custom solution.

Benefits

- The custom frames were designed to give an aesthetic look and meet all the requirements.
