we care for water

PORTFOLIO

Cranberry Township Municipal Campus Cranberry Township, PA

For nearly 30 years, the Cranberry Township Municipal Center has housed the Township's offices, departments, and community services. It was located on Rowan Road in the early 1940s and hosted Township Supervisor meetings—and not much else. It was renovated in the early 1970s to serve as the Township's official office space and recently planned for new upgrades.

Project Design Brief

HRG engineers chose ACO Stormbrixx SD for this project due to its low cost, availability, close proximity to the jobsite, and ease of installation. The engineers devised a large infiltration bedding system to slowly seep storm water into the stone bedding and the small StormBrixx tank via underdrains. A total of 400 half modules, 80 side panels, and 399 top covers of ACO Stormbrixx SD have been installed.

Benefits

- StormBrixx® SD system is lightweight and easy to assemble, cutting installation time and cost down.
