PORTFOLIO

Mount Timpanogos Utah Temple American Fork, UT

The Mount Timpanogos Utah Temple is the 49th operating temple of The Church of Jesus Christ of Latter-day Saints. The temple is located in American Fork, Utah, and is the second temple built in Utah County.

Project Design Brief

The Mount Timpanogos Utah Temple sought to replace their outdated French drain system with something that would prevent water from collecting in the parking lot and on the landscape, making the majestic temple appear unsightly and hazardous. StormBrixx® SD is completely traffic rated for HS20, and the column design allows loads to be readily absorbed while being driven on. Three layers of the ACO StormBrixx® SD were installed in a short period of time.

Benefits

- StormBrixx® SD allows for easy access and maintenance from the groundskeeper.
- Due to StormBrixx® SD providing a 97% void ratio, that allowed for a taller, deeper system without going wider.
