

Luxury doesn't need to be limited.

ACO ShowerDrain

The ACO ShowerDrain Premium product line offers linear and point drains.

By laying this fold-out out, you can visualize how either piece looks full scale. The point drain to the left is our Mix grate pattern in 6" x 6". To the right is our Mix grate in a 27" (700 mm) linear channel.

ART & style

Art & Style

Shower grates are pieces of art than can enhance the style of the floor and the overall bathroom design.

The Art of Function

Products are designed to provide a long and reliable service life. The stainless steel materials and smooth surfaces guarantee safe drainage and hygiene in bathrooms.

The Art of Versatility

Linear drains can replace traditional curb barriers by intercepting water at a wet/dry boundary, or be positioned at the wall with a simple slope directing water away from the dry area. Removing curbs improves accessibility for walking aids and wheelchairs while also removing trip hazards for all ages. Simple, single direction flooring slopes also eliminate uneven floors caused by multi-directional slopes, required by point drains, making the use of seats and walking aids easier.

The Art of Quality

Manufactured from superior materials to high standards held by US craftsmen, ACO ShowerDrain products are designed to last. Quality is not limited to the design, materials and finish; ease of handling and installation are also given the same attention to detail.

SHOWERCHANNEL

- Stainless steel channels available in six standard lengths, from 27.55" (700 mm) to 55.13" (1400 mm).
- Shower channel body to suit either CPE shower membrane, fabric membrane or hot-mopped painted membrane. Flange edge channel with factory-fitted, waterproof, fabric membrane also available.

- Centrally located 2.0" (51 mm) stainless steel spigot outlet with optional debris strainer. Vertical and offset outlets within the channels are also available.

- Variety of 16 gauge - 0.06" (1.5 mm) stainless steel designer grates in all standard lengths with nylon alignment studs in the ends (except Tile-In, Solid, Glass, & Linear), providing friction-fit locking. Lifting key provides easy removal.

- Stainless steel grates available in either a polished steel or oil-rubbed bronze finish. Custom finishes are available upon request.

- Discreet tile-in grate available to provide a subtle drain to match your flooring.

- Pipe connection options include a drain flange or compression gasket. Adjustable plastic feet are included to support the channel during installation.

SHOWERPOINT

- Drain bodies (shallow and deep) are manufactured from chrome plated ABS plastic with a stainless steel edge frame to match your grate. The Tile-In drain body is manufactured from stainless steel.

- Variety of designer styles, 0.19" thick, grade 304 stainless steel grates.

- Tile tray has 0.45" (11.5 mm) recess to accommodate tile and mortar. Manufactured from all stainless steel.

- Supplied pipe connection with either threaded coupling attachment for membrane clamp, 2" no-hub adjustable coupling, compression gasket or solvent weld connection.
