

ACO SplashLight

Cut Sheet

Part No. 140200

Easy Installation

After replacing the existing bumper pins with the new ones on the grate, all it takes is sliding the SplashLight unit in until it locks into place. For full installation instructions, visit www.acobd.com/splashlight

Compact Design

Sleek and compact design makes it unnoticeable in your shower and easy to pop out to recharge.

Custom Light Programming

Using the programming software called Picaxe, follow the simple steps in the programming instructions to switch between multiple light colors that fit your bathroom's ambiance.

LED Lights

Available in multiple colors, the lights will illuminate once they come in contact with water and will turn off approximately two minutes after the shower is turned off.

Long Battery Life

Under normal conditions of use, a fully charged module should last approximately three to six months before needing to be charged again. For optimum performance, always keep the SplashLights fully charged to preserve lifespan.
