

# ACO DRAIN

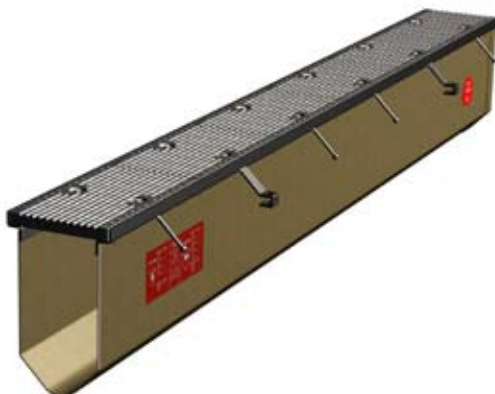

## Lemon Avenue Streetscape Sarasota, FL

### ACO PORTFOLIO

#### Product:

#### *FG200 with Ductile ADA Grates*

The Lemon Avenue Streetscape project was part of a major Sarasota downtown park improvement. The area serves as the location for a weekly farmers market on Saturday when the street is closed to traffic. To ensure rainwater and any washdown does not flood the roadway, and create a driving hazard, a trench drain was required.

Wilson-Miller Engineering chose to use ACO's FG200 fiberglass

trench drain system due to its high hydraulic capacity. Ductile Iron, ADA compliant grates were selected to ensure the safety of shoppers at the market. Each grate is locked to the steel frame with 2 bolts per grate.

The FG200 system gives a large trench hydraulic capacity allowing minimal outlets to be used to drain the area required.
