

# ACO DRAIN

## Broncos Mile High Monument Denver, CO

### PROJECT PORTFOLIO

Product:  
Contractor:

SlabDrain H200K-13, 611Q galvanized perforated grates  
Mortenson Construction Company - Denver, CO

The Mile High Monument, which stands in Parking Lot J, honors the Broncos' home from 1960-2000.

Over 46 feet of the SlabDrain H200K with 611Q galvanized, perforated grates were used to provide adequate drainage when needed, adjacent to the mini-football field replica stadium.

ACO SlabDrain is used where a threshold trench drain is required to intercept liquid and there is restricted depth for the trench drain.
