## PORTFOLIO

### Denver Broncos' Mile High Monument Denver, CO

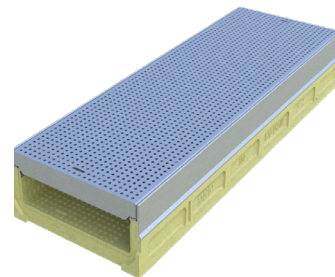

The Mile High Monument is a 3,000-square-foot, 1/8th-scale replica of the original Mile High. It includes 165 seats salvaged from the original stadium and a large-scale video board that plays highlights of the great moments in Mile High history. The Mile High Monument can accommodate up to 300 people for private events and is free to the public before games and during the week.

#### Project Design Brief

Contractors were looking for a durable grid that could withstand floods and hold heavy weight during big events. SlabDrain provided adequate drainage when needed, adjacent to the mini-football field and replica stadium. Over 46 feet of the SlabDrain H200SK with Type 611Q galvanized perforated grates were used to provide adequate drainage when needed, adjacent to the mini-football field replica stadium.

#### Benefits

- ACO SlabDrain accommodates projects with limited depth by using ADA-approved QuickLock locking grates.
