

ACO.

we care for water

## PORTFOLIO

### One Wachovia - Wells Fargo Center Charlotte, NC

One Wells Fargo Center is a 588-foot skyscraper in Charlotte, North Carolina and is the headquarters for Wells Fargo's east coast division. Opening on September 14, 1988, it was the tallest building in North Carolina, until 1992 when it was surpassed by the Bank of America Corporate Center.

#### Project Design Brief

During renovations, a drain system that could evacuate rainfall from the pedestrian area and fit into an existing shallow recess was required. ACO's SlabDrain H100KS-8 was the ideal solution due to having only a 4" depth.

#### Benefits

- The SlabDrain with a stainless steel edge and ADA stainless steel grates provided superior aesthetics and added to the overall look of the plaza.

## ACO Drain®

SlabDrain H100KS-8 with Type 448D  
Longitudinal Stainless Steel Grates
