

ACO. creating
the future of drainage

PORTFOLIO

Hiawatha Playground Seattle, WA

The contractor for the Hiawatha Play Field renovation was looking to create a facility that would better serve guests who want to play baseball, soccer, football, or track. In order to successfully create such a field and to keep that field in great condition, a drainage system would be needed that is both ADA compliant and efficient.

Project Design Brief

ACO's K100 KlassikDrain trench drain with black plastic ADA grates were selected to keep this location safe as the trench drain will effectively drain the water from all pedestrian areas.

Benefits

- KlassikDrain has a 0.5% slope inside the channel ensuring water flows to the outlets.
- Type 494D grates are ADA compliant and will keep the area safe for all pedestrians.
