

ACO. creating  
the future of drainage

## PORTFOLIO

### Jay Pritzker Pavilion - Millennium Park Chicago, IL

Jay Pritzker Pavilion is one of the most popular destinations in Chicago for a wide array of free cultural performances. In addition, the pavilion stands 120 feet above ground.

#### Project Design Brief

Millennium Park needed heel-safe grates for drainage that could withstand the loads of landscaping and other service vehicles. The previous drainage did not account for these issues and had collapsed under such loads.

#### Benefits

- ACO KlassikDrain KS100 and Type 476D longitudinal ductile iron grating provides the load capacity needed.
- Withstands expected traffic while remaining safe for pedestrians in wheelchairs or high heels.
