PORTFOLIO

Geauga YMCA Chardon, OH

The Geauga Family YMCA in Chardon, Ohio has a beautiful indoor swimming pool, hot tub, fitness room, community garden, day camp, child watch center, and much more.

Project Design Brief

The center required a solution for separating the wet pool area from the dry spectator seating area. The modest 2" internal width K50 drain is ideal to serve as an aesthetically appealing barrier between wet and dry areas. The trench was built around the pool and spa tub area to keep swimmers' splashes and puddles from spilling into the dry spectator sections. More than 425 feet of K50 with decorative plastic grates were utilized in the YMCA's pool area.

Benefits

- ACO DrainLok grates are fitted with an anti-shunt mechanism that restricts unwanted grate movement when installed, improving the durability and longevity of the system.
