

ACO DRAIN

**Geauga YMCA
Chardon, OH**

ACO PORTFOLIO

Product:

MiniKlassik with decorative plastic grate

A new YMCA facility in Geauga County was designed with a large pool area for family use.

The problem was separating the wet pool area from the dry seating area. ACO's MiniKlassik was the perfect fit. The small 2" internal width trench drain was designed to act as an aesthetic barrier between wet and dry areas.

The trench was used around the entire pool and spa tub area to prevent splashes and puddles from swimmers spreading into the dry spectator areas. The YMCA's finished pool area used more than 425 feet of MiniKlassik
