

ACO. creating
the future of drainage

PORTFOLIO

Park Newport Apartments Park Newport Beach, CA

When the Park Newport Apartments park was being created, a water feature was part of the design to enhance the beauty of the area. However, this meant that spray from the water fountain may collect on the concrete walkways between the water feature and the shops.

Project Design Brief

To prevent any problems from the fountain overspray and rain, KlassikDrain KS100 trench drain system was used to provide a neat, linear finish to the newly landscaped storefront area.

Benefits

- Due to frequent pedestrian traffic, Type 478Q ADA compliant grates were used to create a safe walking environment.
