

ACO. creating
the future of drainage

PORTFOLIO

Pineview Recreation Center, Dixie Youth
Baseball Park
West Columbia, SC

Pineview Recreation Center has four baseball fields with bleachers and is used by players in the Lexington and Columbia, SC areas. After heavy rainfall, the areas around the bleachers and the infields would remain wet for long periods of time.

Project Design Brief

A drain system was required to keep the water off the four baseball fields and prevent water collecting in the bleacher areas. KS100 with steel slotted grates was used to complete this project.

Benefits

- The steel slotted grates blend in with the overall look of the park.
