

ACO. creating
the future of drainage

PORTFOLIO

Bald Head Island - Deep Point Marina Southport, NC

Deep Point Marina is a new mainland ferry terminal for Bald Head Island. Because cars are not allowed on the island, Deep Point Marina needed to add more parking spaces to handle the rising number of visitors in and out of the island.

Project Design Brief

ACO's S100K PowerDrain with ADA ductile iron grates were selected because of its durability and safety. The Powerdrain heavy-duty trench system can handle the constant flow and increase number of visitors to the area including heavy vehicle traffic.

Benefits

- PowerDrain grates are able to handle the movement of traffic in and out of the area and the are ADA and pedestrian safe.
- ACO S100K heavy duty sloping system is ideal for applications requiring the most durable load capabilities.
