

ACO DRAIN

Bald Head Island - Deep Point Marina Southport, NC

PROJECT PORTFOLIO

Product:

S100K PowerDrain with ADA ductile iron grate

Deep Point Marina is a new mainland ferry terminal for Bald Head Island. Because cars are not allowed on the island, Deep Point Marina needed to add more parking spaces to handle the rising number of visitors in and out of the island.

A trench drain was needed to intercept rainwater because of its close proximity to the water and

to prevent contaminated run-off polluting the coastal waters.

ACO's S100K PowerDrain with ADA ductile iron grates were selected because of its durability and safety. The ductile iron grates are able to handle the movement of traffic in and out of the area and the grates are ADA and pedestrian safe.
