S100K PowerDrain Ductile Iron Slot Grate Painted Gray
Ar Chesson Construction Co, Elizabeth NC

James City County Fire Station #4 needed a heavy duty, sloped trench drain system that could withstand heavy firetruck traffic effectively in their fire station garage. To accomplish this, a Class E grate was used, which can withstand up to 135,000 lbs.

The Ductile Iron Slot Grate was painted gray to provide a more subtle appearance.

The project consisted of 6 identical S100 runs at 32 feet each for a total of 192 feet.
