

ACO. creating
the future of drainage

PORTFOLIO

Fire Station Mantua, OH

The Fire Station in Mantua was established in 1901 and was the 5th department to be organized in Portage County. The department specializes in EMS, inspection, fire safety education, investigation, and has serviced over 12,000 residents of the Fire District.

Project Design Brief

Trench lines were incorporated into the construction of the new fire station to collect runoff water from the truck parking bays. The road slopes toward the structure, and a trench drain was installed at the request of the local fire chief to serve as a barrier drain and collect stormwater.

Benefits

- The ductile iron grates can withstand the heaviest applications up to Load Class G (AS 3996).
