

ACO DRAIN

Michigan State Hall of Justice Lansing, MI

ACO PORTFOLIO

Product:

S100K Powerdrain with ductile iron slotted grates

To avoid unsightly complex falls required by area drains, Albert Kahn Associates designed the parking lot at the new Michigan State Hall of Justice using ACO Drain along the raised curb. This allowed simple clean falls and made construction of the parking lot much simpler and quicker.

Approximately 400' of ACO S100K Powerdrain was installed around the edge of the parking lot.

ACO S100K Powerdrain was selected for its aesthetics and excellent hydraulic performance.

ACO Powerdrain is a pre-cast polymer concrete trench system with integrally cast-in edge rail and choice of ductile iron grates with unique 'PowerLok' boltless lockings.
