

ACO DRAIN

**Novelty Hill - Januik Winery,
Woodinville, WA**

PROJECT PORTFOLIO

Product:

S100K PowerDrain with ductile iron slotted grates

Wineries are areas where spills and frequent wash down of the floors are common. However due to fruit acids and cleaning chemicals a corrosion resistant trench drain is usually required.

When designing this new state-of-the-art 3,100 sq ft winery, the specifier incorporated a trench drain centrally located between the fermenting vats in the barrelling room.

ACO PowerDrain, a heavy duty polymer concrete trench drain, was used as polymer concrete is naturally corrosion resistant and the heavy duty, Load Class F ductile iron grates would withstand carts and forklifts moving the wine barrels around.
