

ACO DRAIN

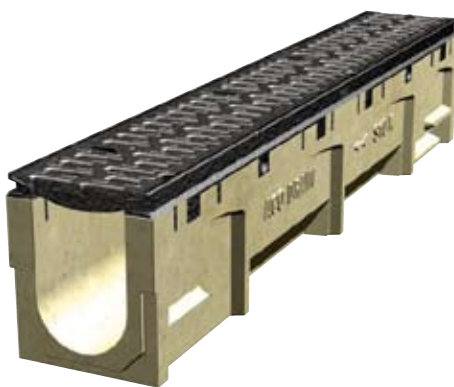

Pilkington Fire Protection Glass Toledo, OH

ACO PORTFOLIO

Product:

S100K Powerdrain with Ductile Iron slotted grates

Pilkington Fire Protection Glass recently opened a new production facility in Toledo, Ohio where glass is continually cut. A drainage system was required to collect fine particles and waste water.

PowerDrain S100K trench drain with slotted ductile iron grates was chosen, as the boltless PowerLok mechanism allows easy access for maintenance, while the Load Class F rating allowed fork lift traffic capability.

A special combination of 4x4 sump boxes were also used to collect and separate the glass particles.

The system has been an enormous success, saving up to eight man hours every time the debris needs to be collected and removed.
