

# ACO DRAIN

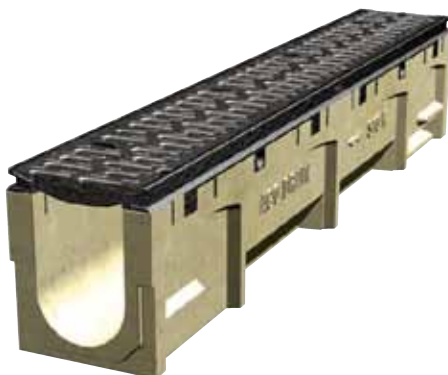

## Spokane Transit Authority Spokane, WA

### PROJECT PORTFOLIO

**Product:**  
**Specifier:**  
**Engineer:**

***S100K PowerDrain with ductile iron slotted grates***  
***Spokane Transit Authority, Spokane, WA***  
***J-U-B Engineers, Inc., Spokane, WA***

The Spokane Transit Authority needed to replace their trench drain system at their Boone Avenue Fixed Route Garage as it was 20 years old, and has become unserviceable and posed a safety concern.

The Engineer decided to use ACO's S100K PowerDrain System with ductile iron slotted grates as a suitable replacement because its

heavy duty sloping system is ideal for applications requiring the most durable load capabilities.

Additionally, the ductile iron slotted grates can withstand movement of the city buses being serviced in the garage as well as handle any run off of oils or other substances that may run over the grates into the drains.
