

# ACO DRAIN

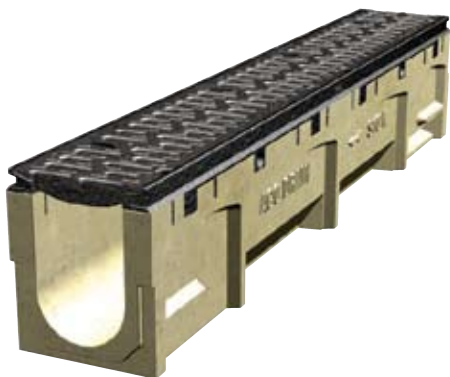

## T115 Port of Seattle Seattle, WA

### ACO PORTFOLIO

**Product:**

***S100K PowerDrain with ductile iron slotted grates***

At the Port, an effective drainage solution was needed to remove stormwater run off and avoid ponding in the cargo area.

A trench drain system was used as this enabled a flat surface to be maintained, which is safer for vehicles moving containers around.

S100K Powerdrain was selected as the heavy duty trench system that

could withstand the constant flow of traffic while loading and unloading cargo.

Apart from withstanding the loadings of the vehicles, the trench drain had to stand up to the bins and skids used while loading and unloading the cargo delivered to the port.
