

ACO. creating  
the future of drainage

## PORTFOLIO

### Granite Source Denver, CO

Granite Source is a wholesaler and direct importer of granite. Their stones are acquired in blocks from Brazil, India, Europe, and China.

#### Project Design Brief

Over 500 feet of PowerDrain S200K with 661Q ductile iron grates were chosen to handle the drainage needs inside the new granite cutting facility at Granite Source. ACO's Tech services department was able to assist with the layout and installation support was provided.

#### Benefits

- ACO PowerDrain is a heavy-duty sloped trench drain system for applications requiring the most rugged product.
- ACO PowerDrain S200K has increased hydraulic capacity that can withhold large amounts of water.
