

ACO. creating
the future of drainage

PORTFOLIO

Aberdeen Proving Ground Project Aberdeen, MD

Aberdeen Proving Ground (APG) is a United States Army facility in Harford County, Maryland. APG is the US Army's oldest operating proving ground, having been founded on October 20, 1917, six months after the United States entered World War I.

Project Design Brief

The installation of ACO's PowerDrain® S300K in conjunction with the SK3 slotted ductile iron grate is part of the renovation project. The heavy duty S300K system ensures that the site is free of harmful dangers by draining surface water.

Benefits

- The Load Class F rating ensures PowerDrain has no problem withstanding daily abuse from heavy trucks and construction vehicles.
