

ACO. creating
the future of drainage

PORTFOLIO

Grassy Key Fire Station Marathon, FL

The Grassy Key Fire Station is a 5,000 square foot station that occupies a two-bay garage and firefighter bunkrooms. The Fire Station is equipped with energy efficient lighting, high-tech climate control, and specialized washing machine.

Project Design Brief

Given the massive amount of rainfall that south Florida receives, as well as the tremendous amount of water utilized during training routines, a solution for draining away surface water is essential. PowerDrain S300K, with compelling features such as an 12" internal width and loading specifications up to class F, made it the ideal solution to satisfy all the requirements.

Benefits

- PowerDrain S300K has high hydraulic capacity, enabling removal of large amounts of water in a short period of time.
- The slotted ductile iron grates are rated Load Class F which can withstand the constant movement of emergency vehicles crossing over the grates.
