Contractor:

S300K PowerDrain with Ductile Iron slotted grate
Ben Dyer & Associates, Mitchellville, MD
D&M Utilities Inc., Davidson, MD

The Pohanka Honda & Hyundai dealerships are located adjacent to each other with a shared access road between the service bays.

During a recent remodel a new trench drain was added down the center of this access road. Due to the dynamic loading of vehicles driving down the length of the trench drain, a heavy duty trench drain was required.

ACO PowerDrain S300K was selected to not only provide the required hydraulics and heavy duty Load Class F grates, but also due to the 'anti-shunt' lugs built into the grates and rails. These 'lugs' prevent longitudinal movement of the grate in the channel, that over time, can lead to premature failure of the system.
