

ACO DRAIN

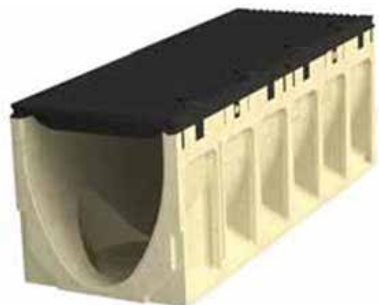

Circle K Casa Grande, AZ

PROJECT PORTFOLIO

Product:

PowerDrain S300K, longitudinal iron slotted grates

Circle K has become one of the most widely recognized convenience store brands, known worldwide for quality products and customer service.

This Circle K parking lot needed to make sure it stayed dry but could also handle the heavy traffic of fuel trucks coming onto the site. Installation was made simple with ACO's installation devices.

PowerDrain S300K features a 12" (300 mm) internal width channel system with built-in 0.5% slope and developed V-shape profile for enhanced hydraulic performance. The longitudinal ADA-compliant ductile iron grate is designed to withstand the heaviest applications up to Load Class F.
