

ACO. creating
the future of drainage

PORTFOLIO

Suntrust Park, Atlanta Braves Stadium Atlanta, GA

ACO provided several hundred feet of drainage that was installed on the ball field, loading dock, courtyard, pavilion, parking garage, and the side of the street. To top it off, the grates in the pavilion area had to match existing decor, and ACO made it happen.

Project Design Brief

ACO KlassikDrain KS100 with longitudinal stainless steel grates was ideal for walkways and building entrances to reduce ponding for pedestrian.

Benefits

- ACO KlassikDrain KS100 and longitudinal stainless steel grates provide Load Class B strength which is up to 28,101 lbs or 967 psi.
