

ACO. creating
the future of drainage

PORTFOLIO

1655 Carla Ridge
Beverly Hills, CA

Carla Ridge is a street in the residential area of Trousdale Estates in Beverly Hills. It begins in the south on Schuyler Road and ends in the north shortly after the junction of Walker Drive.

Project Design Brief

The ACO StormBrixx® detention system provided here replaced a large diameter pipe design that would have negatively affected local protected trees. The system is 95% storage efficient and provided over 1,000ft³ of storage in a 6'x 30' footprint.

Benefits

- The ACO StormBrixx® system is fully traffic rated for HS25 and the continuous column design allows for cover heights up to 20'.
- The system is modular and lightweight and requires no heavy equipment for installation or rock for structural stability.
