

ACO. creating  
the future of drainage

## PORTFOLIO

### Bahama Bucks St. George, UT

Bahama Bucks is a franchise specializing in shaved ice and other frozen non-alcoholic beverages. This one in St. George, Utah was a new location that needed a water management system to prevent flooding in their parking lot.

#### Project Design Brief

The ACO StormBrixx® SD system is fully traffic rated for HS20 and the column design allows for loads to be absorbed easily while being trafficked by vehicles. The system is extremely lightweight and requires no heavy equipment for installation or rock for structural stability. ACO StormBrixx® SD was the right size for the small footprint of the parking lot and could match the current unique layout without sacrificing water intake

#### Benefits

- Due to StormBrixx® SD providing a 97% void ratio, the system's footprint can be smaller and more cost effective.
