

ACO. creating  
the future of drainage

## PORTFOLIO

### Blue Cross Blue Shield Detroit, MI

Blue Cross Blue Shield is a nonprofit mutual insurance company founded in 1939 and is the largest health insurer in Michigan, serving 6.2 million people in the United States.

#### Project Design Brief

Blue Cross Blue Shield of Detroit, MI has joined in the efforts of the downtown Detroit revitalization. As part of the revitalization outside their corporate offices, they installed a water feature. The design of the water feature required a drainage system to capture and recirculate the water. To avoid compromising aesthetics, a discreet drainage system was needed. ACO's Brickslot system was chosen to be the best option for discreet and aesthetically pleasing drainage.

#### Benefits

- Brickslot is designed to compliment any surrounding aesthetic.
- The 3/8" flared slot is discreet and also prevents debris from being trapped and blocking the opening.
