

ACO. creating  
the future of drainage

## PORTFOLIO

### Buccament Bay Resort Buccament Bay, St. Vincent

Buccament Bay Resort is located on the stunning Caribbean island of St. Vincent, surrounded by lush green mountains and a rainforest with a beautiful white sand beach.

#### Project Design Brief

A low profile drainage solution was required to compliment the beautiful resort aesthetic. The drainage was needed in an outdoor seating and lounging area where it was common for puddling, especially during tropical storms. ACO's Brickslot was found to be the solution, in conjunction with sloped trench drain channels underneath.

#### Benefits

- Brickslot is a discreet trench drain specifically designed for brick and stone pavers.
- The 3/8" flared slot is discreet and also prevents debris from being trapped and blocking the opening.
