

ACO DRAIN

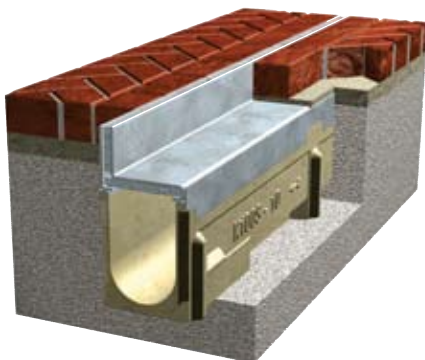

Legacy Village Beachwood, OH

ACO PORTFOLIO

Product:

Brickslot with K100S channel

A new outdoor shopping facility opened in Beachwood, OH. To keep the experience safe during the winter months, underground heating was installed on the walkways to melt away snow and ice. A discreet trench drain was needed to remove the water, and the product needed to work well with brick pavers. ACO's new Brickslot was able to fulfill both requirements

Brickslot is a discreet trench drain specifically designed for brick and stone pavers. The 3/8" flared slot not only blends in with the paving joint, but also prevents debris from being trapped and blocking the opening. When construction was completed, more than 2,000 feet of ACO's Brickslot was used.
