

ACO DRAIN

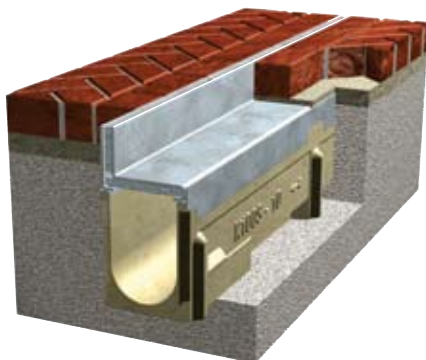

Peppermill Hotel and Casino Reno, NV

PROJECT PORTFOLIO

Product:

Brickslot with KS100S channel

During the expansion and remodel of the Peppermill Hotel & Casino in Reno, NV the pool & garden entertainment deck were refurbished. As part of the remodel a trench drainage system was added to avoid any slip hazards caused by rainwater, over spray from the pools water feature and splashing from the pool.

The drainage system also needed to complement the aesthetics of this high profile area.

ACO Brickslot proved to be the ideal solution, as it is a discreet trench drain specifically designed for brick and stone pavers. The 3/8" flared slot is discreet and also prevents debris from being trapped and blocking the opening.

Access for maintenance is via removable access trays filled with the same pavers, continuing the discreet, aesthetic look.
