

ACO.

we care for water

PORTFOLIO

Burger King Phoenix, AZ

Burger King is the world's second largest fast food hamburger chain, having been founded in 1954. It was critical for the development of the facility in Phoenix, Arizona, to have a storm water retention and detention system for the parking lot.

Project Design Brief

The StormBrixx® HD detention system provided by ACO, Inc. replaced a CMP design in a tight, traffic-loaded space with existing infrastructure. The lead engineer chose to use StormBrixx® HD in place of CMP due to the immediate availability of the product and ease of installation on the jobsite. Since the new StormBrixx® HD system is 95% storage efficient, the entire 1,692 ft³ system fits into a compact 29' x 9' x 6' footprint.

Benefits

- StormBrixx® HD has a 95% void ratio and is light-weight making the system easy to install.
