

ACO. creating
the future of drainage

PORTFOLIO

CarMax Norco, CA

CarMax in Norco, California is a new auto dealership with supporting auto services using a total of approximately 11,447 ft² within an approx 6.74 acre project site.

Project Design Brief

Originally specified with a CMP system but builders decided to switch to ACO StormBrixx® SD. The ACO StormBrixx® SD system is fully traffic rated for HS20 and the column design allows for loads to be absorbed easily while being used by vehicles. ACO StormBrixx® SD was the right size for the depth restrictions and reduced the overall size of the footprint.

Benefits

- Due to StormBrixx® SD being lightweight, the system was installed easily and quickly therefore bringing the labor costs down.
- StormBrixx® being HS20 rated allows CarMax to confidently handle any moving vehicle up to an 18-wheeler.
