

ACO. creating  
the future of drainage

## PORTFOLIO

Dollar General  
Dallas, TX

Dollar General is an American chain that has approximately 15,000 stores nationwide. The store delivers low prices on America's most trusted brands and products.

### Project Design Brief

Dollar General was in need of a water management solution for one of their new Dallas locations to compensate for flash-flooding. Despite rain delays with clay-based soil, first-time installers knocked out 6,000 ft<sup>3</sup> of StormBrixx<sup>®</sup> in six hours.

### Benefits

- ACO StormBrixx<sup>®</sup> HD is fully traffic rated for HS25 and the continuous column design allows for cover heights up to 20'.
- The system was installed in six hours, thus speeding up the timeline needed to complete construction.
