## Mt. Si High School Snoqualmie, WA

### PROJECT PORTFOLIO

#### *Product:*

#### *System 2000*

During the repair and improvements of the Mt. Si High School in Snoqualmie, Washington, ACO Sport System 2000 slotted trench drain was used around the track.

Due to the track being built on an area prone to flooding, the school needed an effective drainage system. ACO Sport System 2000 was chosen because of its high hydraulic capacity.

The smooth, flat surface of the drain allows track material to be bonded to the trench which assists anchoring the track surface.

System 2000 is available in straight and radiused sections to fit exactly around all parts of a running track.
