

ACO SPORT

Doug Shaw Memorial Stadium Myrtle Beach, SC

PROJECT PORTFOLIO

Product:

System 4000 with black plastic ADA grates

Doug Shaw Stadium is a multi-use stadium that is used for football, soccer, and track and field activities. It is the county's premier track and field venue and home to the Myrtle Beach High School Seahawks.

The engineers were looking for a drainage system that could remove rainwater from the track and overspray from the track and field

area without taking away from the overall look of the area.

ACO's Sport System 4000 was chosen because it could handle the flow requirements and provided an aesthetically pleasing transition from grass to track. Additionally, the ADA compliant grates ensure the safety of the athletes crossing the grates from the track to the field.
