## Hart Park Athletic Field Improvements Wauwatosa, WI

### PROJECT PORTFOLIO

**Product:**  
**Specifier:**  
**Contractor:**

***System 4000 with grey plastic ADA grates***  
***Graef, Milwaukee, WI***  
***Triad Construction, West Allis, WI***

When considering a trench drain for the project, the bleacher area became a concern due to the overall cost of the track surfacing. The design team wanted to be certain that soda and other debris would be caught before coming in contact with the track itself.

ACO Sport System 4000 was chosen because the grate system

allowed for true capture of debris and gave the track overall protection.

All while the installed trench drain does not take away from the overall look of the track and the ADA compliant grates are safe for the athletes to walk or run over during games.
