

PROJECT PORTFOLIO

Product:

System 4000 with black plastic ADA grates

The Historic Hayward Field in Eugene, Oregon is home to the 2008 Olympic Trials for track and field.

The contractors for Hayward Field worked on a redesign of the present field to make sure the field would be picked to host the Olympic Trials for track and field.

The project used System 4000 with black ADA compliant grates and in-line catch basins were used to connect to the stormwater drain.
