## Hearst Playground Washington, DC

### PROJECT PORTFOLIO

**Product:**

***System 4000 with black plastic ADA grates***

While revitalizing Hearst Playground in Washington, DC, the contractor decided a trench drain system was needed to preserve the life of the playground and landscaping - a mix of natural grass, gravel and paving.

ACO Sport's System 4000 was chosen for the job because it blends easily with the landscaping of the playground and its excellent hydraulic capabilities.

Additionally, the black plastic ADA grates were used as they give full access to the channel for easy maintenance and cleaning and provide a safe transition for the children playing between the landscaped surfaces.
