

# ACO SPORT

## Liberty University - Osborne Stadium Lynchburg, VA

### PROJECT PORTFOLIO

**Product:**

**System 4000 with grey plastic ADA grates**

Sporting facilities use a wide variety of hard & soft surface materials and Osborne Stadium is no different. All external venues should incorporate surface drainage to protect these surfaces.

Osborne Stadium used ACO Sport System 4000 outside of the tracked area because an open system allows easy access for cleaning and

removal of stray surface particles. This system will keep any water or other liquids that may spill from the bleacher area off the track surface, while the plastic grates are safe for athletes to cross over and are aesthetically pleasing.
