***System 4000 with black plastic ADA grates
Fanning/Howey Associates, Indianapolis, IN
Globe Asphalt Paving Co., Indianapolis, IN***

During the refurbishment of the schools athletic facilities, the drainage for the track was to be replaced. This would ensure that the track had it's own drainage system and would prevent any rainwater from flooding the area.

ACO Sport System 4000 was selected for the drainage in this

project because of it's neat, linear finish that followed the tracks surface and did not distract from the aesthetics of the project.

In, addition, the black plastic ADA compliant grates create a safe transition for athletes traveling from the running track to the playing field.
