## New Watauga High School Boone, NC

### PROJECT PORTFOLIO

**Product:**

***System 4000 with black plastic ADA grates***

The Watauga High School was being rebuilt - replacing the old facility that was built in 1965. During the planning process it was decided that the new athletic facility would need a trench drain system that could withstand the winter weather.

ACO Sport System 4000 was chosen because of its ability to keep standing water off the track surface as well as add to the aesthetics of the facility. Additionally the black plastic ADA grates are safe for the athletes to run across during practices and competition.
